

Law & Order, Maxitek Mobile Shelving

Bosco Storage Solutions installed a custom-built Maxitek mobile library shelving system in Sydney University's impressive new Faculty of Law Building library.

Incorporating both style and function, the sophisticated Maxitek mobile shelving system was installed flush with an architecturally designed bulkhead and with white laminate dress panels.

Maxitek's underfloor track system within the slab and the unique bay locking device offer Occupational Health and Safety benefits for the multitude of law students and academia accessing the law reports housed in the University Faculty of Law library's 1947 lineal metres of rolling shelving.

Fisher Library is renowned internationally and is an iconic building of Sydney University. The Faculty of Law Building

and associated components occupy a significant site within the Camperdown Campus, with the Law Building being the visually dominant element of the project.

Bosco worked closely with the University of Sydney and their appointed Architect on the design, manufacture and installation of the Library's 391 bay Maxitek customised mobile storage system.

When opened in 1963, Fisher Library was the epitome of library design. The building has served the University well for over forty years. With more than 1.7 million visitors a year, the building has become one of the most heavily used on campus. The passage of time, increased student numbers, changes in publishing

Heavily laden bay units can be moved effortlessly

and pedagogical development took their toll, with the library collection becoming increasingly difficult to use due to cramped shelving.

With extra power for easy movement of several library shelving units, the mechanical drive option selected by the University enables heavily laden shelf units to be moved effortlessly.

The high precision parallel guiding mechanism and double ball bearing cast iron running wheels guarantee maximum ease of use with minimal force required. Units incorporate an anti-tilt mechanism providing dependable and secure operation.

Bosco Storage Solutions has a reputation for producing high quality, innovative products that are designed to meet their required specifications. Bosco excel in customising their products through its design and manufacture and our investment and focus on product development reinforces our commitment to providing customers with efficient and reliable solutions for library and archive storage.

The end result for the University of Sydney's Law Library was a tailored and professional library storage system offering innovative design features and superior flexibility.
